

## Press Release

### Honorary professorship for DMT division manager

**Essen, Germany, 16.04.2014. The University of Leoben, Austria's university for mining, metallurgy and materials, has conferred an honorary professorship on Dr Bodo Lehmann, head of the Exploration & Geosurvey division at DMT GmbH & Co. KG. The award ceremony took place on 4 April 2014 in the university's Erzherzog Johann Auditorium.**

Lehmann, who has been lecturing at several universities since 1996, was first contracted by Leoben in 2006. This year the assistant lecturer for applied geophysics also took over the obligatory lecture "Engineering Geophysics" at the mining university, where he achieved habilitation in 2010.

Lehmann has over 25 years of professional experience in his field. On the strength of his previous research and work performance, he was appointed as head of the Exploration & Geosurvey division at DMT in 2009 and is a managing director of the Czech subsidiary DMT-Geosurvey spol. s r.o. and DMT Petrologic GmbH in Hanover.

Additionally, as a board member of the German Society for Geophysics and member of multiple international working groups, he has long been concerned with researching, teaching and putting to practical use geophysical know-how for the exploration of natural resources and ground surveying.

**About DMT**

DMT GmbH & Co. KG, headquartered in Essen, Germany, is an independent engineering and consulting company, active at international scale. The DMT Group boasts about 1,000 employees, most of them engineers, scientists and technicians, who provide services in the form of individualised consulting and assistance tailored specifically to the clients' needs. They also serve as impartial assessors. The firm's activities focus on the fields of natural resources exploration, mining and cokemaking technology, construction and infrastructure projects, safety in buildings, product testing and measurement instrumentation in industrial settings. DMT is a member of the TÜV NORD GROUP.

**About Exploration & Geosurvey**

Using methods and techniques drawn from the fields of geology and hydrogeology, geophysics, geodetics and geotechnology, the Exploration & Geosurvey Division supplies the data needed to achieve planning reliability for the extraction of natural resources (oil and gas, coal, salt, deep geothermal energy and others), for relieving the environment (carbon capture and sequestration, reducing CO<sub>2</sub> emissions etc.) and for special-purpose civil engineering. Our work, concentrated in a single company and reaching all around the world, begins with planning, includes surveying and interpretation and extends to modelling and the final evaluation. And to ensure the very best results we also develop, operate and market our own geosurveying systems.
