

## Press Release

### DMT strengthens corporate brand

## 2013 name change for Petrologic

**Essen, 02.01.2013. DMT, the Natural Resources Division of the TÜV NORD Group, is implementing a uniform branding policy for its subsidiaries around the world. As part of the measures to strengthen the DMT brand, Petrologic Geophysical Services GmbH has been renamed DMT Petrologic GmbH with effect from 01.01.2013.**

Petrologic is well established in the international market for seismic special processing and renowned for its modern services. "Our company and staff will continue to be the reliable business partner our customers know", explained Gerd Rybarczyk, Managing Director.

DMT has been active in the field of natural resources exploration ever since Ludger Mintrop developed the seismic exploration method over 100 years ago. The company is still at the forefront today, offering a wide portfolio of innovative solutions to suit the current market. By integrating DMT Petrologic into the exploration activities of DMT, the company is able to offer clients added competence and complete solution packages for geo-exploration and thereby provide greater planning reliability and effectiveness.

**About DMT**

DMT GmbH & Co. KG, headquartered in Essen, Germany, is an independent engineering and consulting company, active at international scale. The DMT Group boasts about 1,000 employees, most of them engineers, scientists and technicians, who provide services in the form of individualised consulting and services tailored to clients' needs. They also serve as impartial assessors. The firm's activities focus on the fields of natural resources exploration, mining and cokemaking technology, construction and infrastructure projects, safety in buildings, product testing and measurement instrumentation in industrial settings. DMT is a member of the TÜV NORD Group.

**About Exploration & Geosurvey**

Using methods and techniques drawn from the fields of geology and hydrogeology, geophysics, geodetics and geotechnology, the Exploration & Geosurvey Division supplies the data needed to achieve planning reliability for the extraction of natural resources (oil and gas, coal, salt, deep geothermal energy and others), for relieving the environment (carbon capture and sequestration, reducing CO<sub>2</sub> emissions etc.) and for special-purpose civil engineering. Our work, concentrated in a single company and reaching all around the world, begins with planning, includes surveying and interpretation and extends to modeling and the final evaluation. And to ensure the very best results we also develop, operate and market our own geosurveying systems.
