

## The management trainee

*“Hello, Guten Tag!*

*My name is Muhammed Danish. I joined DMT Group as a management trainee in the International Trainee Program of TÜV NORD GROUP in 2013 and was exposed to the global market and involved in various international projects right from the start, dealing with marketing strategies, marketing plans, business collaborations and technical intelligence.”*

Muhammed Danish completed his bachelor's in mechanical engineering followed by his master's in mining machinery engineering with a gold medal from the Indian School of Mines, Dhanbad, India. After the successful completion of the TÜV NORD training program, DMT was happy to offer him a working contract.

*“I'm now on board as an employee with a new set of roles in marketing and business development in the field of bulk materials engineering.*

*I must confess that during my trainee program I was quickly convinced that **DMT is a great place for young eager and creative minds to apply the skills and knowledge they possess and let their talent prosper in a positive working environment** under the supportive guidance of mentors & supervisors.”, says Danish.*

At DMT we try to enable our trainees to get the best practical approach and insight into their new jobs and future areas of expertise.

Danish's conclusion: *“It's wonderful to be here and I just want to say that I am proud to be a part of the DMT Group family.”*
