DMT acquires Dr.-Ing. Wesemann Ges. für Ingenieurgeodäsie mbH Geotechnical system provider for infrastructure projects

Essen, Germany, 29.09.2015. With the purchase of the Dr. Wesemann engineering firm on 21.09.15, the Essen based technology service provider DMT GmbH & Co. KG has expanded its service portfolio to include the provision of geotechnical systems for infrastructure projects.

The acquisition of Wesemann will increase market access for DMT as well as the expertise of its “Geo Engineering & Exploration” division. Wesemann primarily operates in the fields of pipeline construction (civil engineering), engineering surveying and industrial surveying, geo-information systems (GIS) and documentation with Computer Aided Design (CAD). Wesemann will remain an independent company within the DMT group, keeping both its current sites in Herne and Hamburg.

“DMT is well-established as a provider of first-class specialist services and high-precision surveying in the engineering surveying market, whereas Wesemann offers a comprehensive and established portfolio of GIS/CAD applications and analyses plus specialist know-how in pipeline engineering,” explains Prof. Dr. Eiko Räkera, CEO at DMT, when summing up the status quo of the two firms. “Our customers will be able to benefit from the extensive and attractive service range of the DMT group as we prepare for the upcoming decentralisation and network expansions in the energy sector.”

Earth. Insight. Values.

Wesemann has been providing long-term support to big-name customers in both the Ruhr area and northern Germany in the form of documentation and development of digital pipeline registers as well as the planning and implementation of pipelines and supply systems. DMT is also confident that the acquisition will provide further valuable competence in the field of industrial surveying, including the specialist areas of measuring ship deformations and documenting ship hulls. For years DMT has been rendering rope and product testing as well as fire protection measures and expert reports on fire safety for the shipbuilding industry. Wesemann will complement DMT's services providing as-built-documentations and deformation measurements for damage surveys.

“New economic prospects for both companies will arise through access to common customer potential,” adds Räkera with certainty. “In fact, intercompany cooperation is already underway.”

About the DMT group

DMT is a group of engineering and consulting firms with over 30 offices around the world, providing interdisciplinary services in the markets Oil & Gas, Mining, Civil Engineering & Infrastructure and Plant Engineering. Its extensive service portfolio offers exploration, engineering, consulting and geotechnical solutions that are innovative and tailored specifically to the clients' needs. DMT's product range includes a line of diverse industrial measuring systems and specifically developed industrial test products. DMT is a member of TÜV NORD GROUP. www.dmt-group.com

About Wesemann

Dr.-Ing. Wesemann Gesellschaft für Ingenieurgeodäsie mbH, founded in 1967, employs a total of 42 staff at its two sites in Herne and Hamburg. The firm's service portfolio focuses on pipeline engineering, industrial and engineering surveying plus documentation, data analysis and programming. www.ib-wesemann.de
