## DMT explores subsoil in the Dead Sea

### Contract for geophysical ground survey

**Essen, Germany, 25 July 2017. The world's 8th largest potash producer, the Jordanian firm Arab Potash Company Ltd., is engaging the services of the German engineering and exploration company DMT for a ground survey at the Dead Sea.**

In the Jordanian part of the sea, in the south-eastern area, depths, reliefs and coastal lines are to be mapped. In addition the layers and sediments below the seabed will be explored and characterized. The aim of this geophysical ground survey is to create a subsurface model for a planned pumping station, which will transport water from the Dead Sea to the potash production plant.

“This highly demanding and interesting project supports DMT’s strategy to expand our business activities in this region,” explains Prof. Eiko Räkera, CEO. The survey, including a bathymetric survey as well as shallow water seismic investigation in an area of approximately 14 km<sup>2</sup> and a coastal topographic survey, will be carried out over a period of 2 to 3 months.

### **About the DMT group**

DMT is a group of engineering and consulting firms with over 30 offices around the world and ca. 1,000 employees, providing interdisciplinary services in the markets Oil & Gas, Mining, Civil Engineering & Infrastructure and Plant Engineering. Its extensive service portfolio offers exploration, engineering, consulting and geotechnical solutions that are innovative and tailored specifically to the clients' needs. DMT's product range includes a line of diverse industrial measuring systems and specifically developed industrial test products. DMT is a member of TÜV NORD GROUP.
